83   config.methods.forEach((method, index) => {
84     console.log(`${index + 1}. ${method}`);
85   });

```

Penjelasan :

- fs: Modul file system untuk membaca file konfigurasi.
- readline: Modul untuk membaca input dari pengguna melalui terminal.
- Konfigurasi jika file eksternal tidak tersedia.
- threshold: Batas nominal untuk biaya transfer rendah/tinggi.
- methods: Daftar metode transfer.
- confirmation: Kata yang harus diketik user untuk konfirmasi transaksi.
- Mencoba membaca file bank_transfer_config.json.
- Jika gagal (misalnya file tidak ditemukan), maka gunakan defaultConfig.
- Membuat interface input.
- Menentukan bahasa yang digunakan (id atau en).
- Menyimpan seluruh pesan yang akan ditampilkan dalam 2 bahasa.
- Disesuaikan berdasarkan konfigurasi (config.lang).
- Menjalankan proses dari awal, yaitu meminta input jumlah uang yang akan ditransfer.
